Task 1 – Portfolio Website

Prompt:

Design a personal portfolio website with sections for About Me, Projects, and Contact. Include a navigation bar with smooth scrolling and create a responsive layout using CSS.

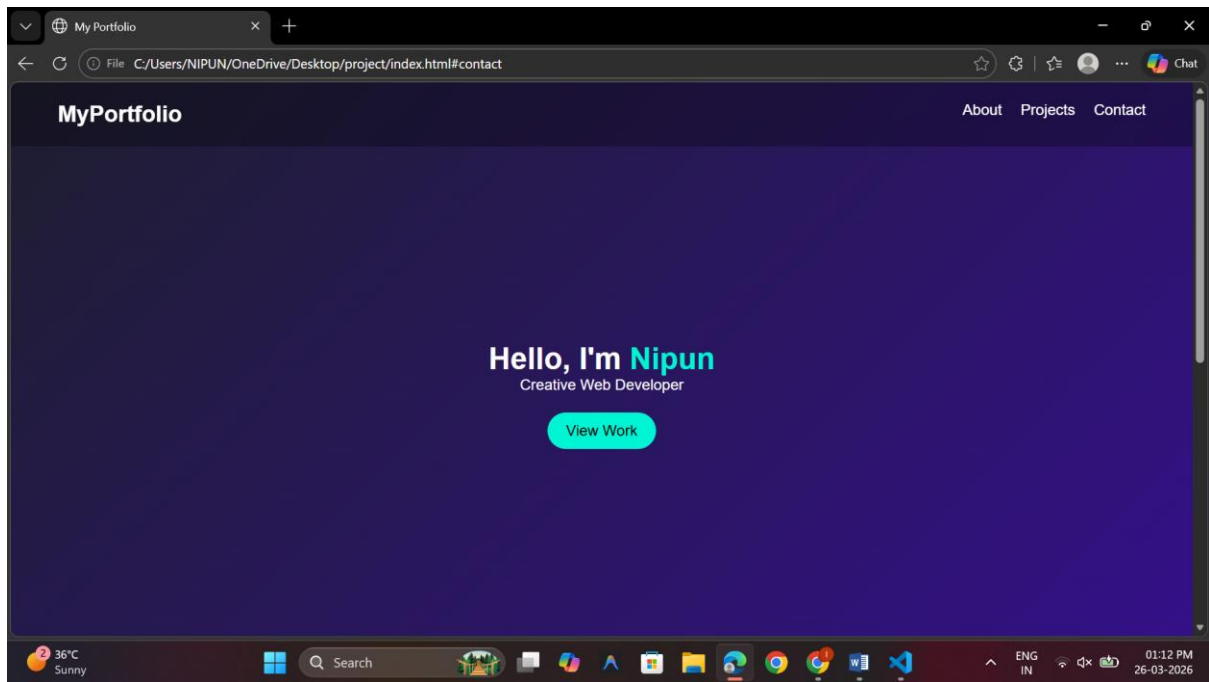

Code:

A screenshot of a code editor window showing the HTML code for a portfolio website. The code is written in a dark-themed editor with a sidebar on the left showing file explorer and search. The main editor area displays the following HTML code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>My Portfolio</title>
7   <link rel="stylesheet" href="style.css">
8 </head>
9 <body>
10
11 <!-- Navbar -->
12 <nav class="navbar">
13   <h2 class="logo">MyPortfolio</h2>
14   <ul>
15     <li><a href="#about">About</a></li>
16     <li><a href="#projects">Projects</a></li>
17     <li><a href="#contact">Contact</a></li>
18   </ul>
19 </nav>/.navbar
20
21 <!-- Hero Section -->
22 <section class="hero">
23   <h1>Hello, I'm <span>Nipun</span></h1>
24   <p>Creative Web Developer</p>
25   <a href="#projects" class="btn">View Work</a>
26 </section>/.hero
27
28 <!-- About -->
29 <section id="about" class="section">
```

The code is currently at line 15, column 40. The status bar at the bottom shows "Ln 15, Col 40", "Spaces: 4", "UTF-8", "CRLF", and "HTML". The system tray at the bottom shows the date and time as "01:13 PM 26-03-2026".

Output:

Observation:

The website displays all sections clearly with smooth navigation. The layout is responsive and adjusts well to different screen sizes. The design is simple, clean, and user-friendly.

=====

Task 2 – Online Store Product Page

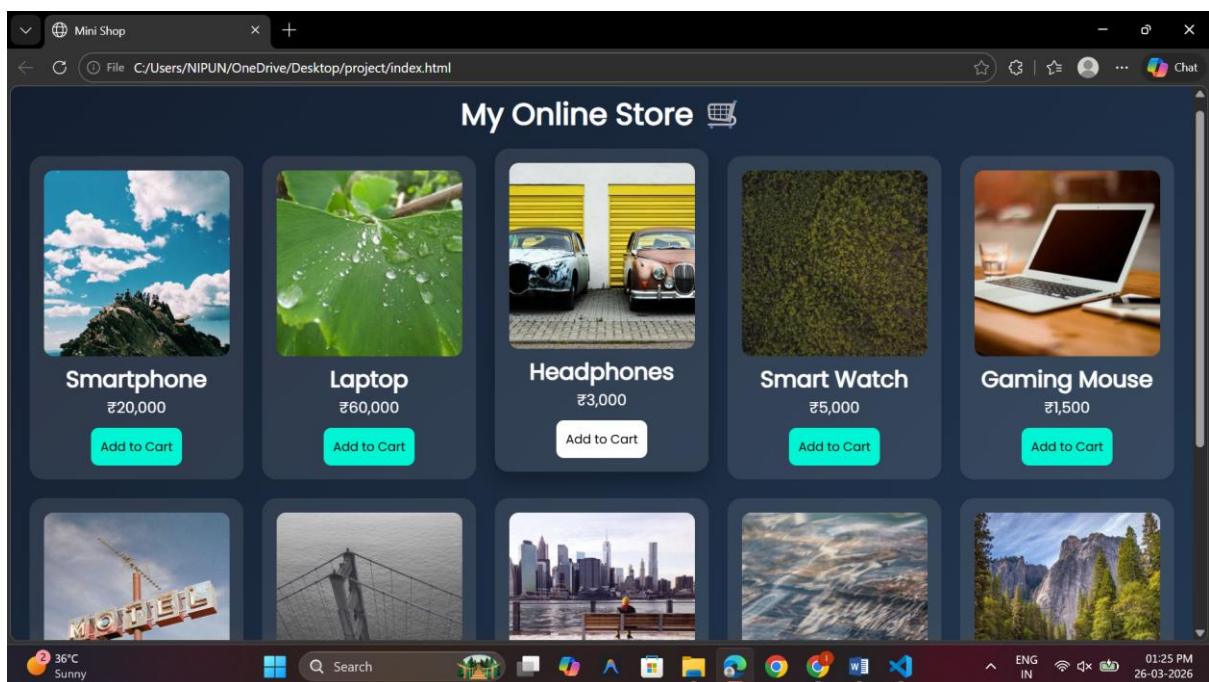

Prompt:

Create a product display page that shows product image, title, and price with an “Add to Cart” button. Add hover effects and display an alert when the button is clicked.

Code:

```
File Edit Selection View Go ... Search
index.html X # style.css JS script.js
C:\Users\NIPUN\OneDrive\Desktop\project> index.html > ...
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Mini Shop</title>
7   <link rel="stylesheet" href="style.css">
8   <link href="https://fonts.googleapis.com/css2?family=Poppins&display=swap" rel="stylesheet">
9 </head>
10 <body>
11
12 <h1 class="shop_title">My Online Store </h1>
13
14 <div class="shop">
15
16   <!-- 1 -->
17   <div class="product">
18     
19     <h2>Smartphone</h2>
20     <p>₹20,000</p>
21     <button onclick="addToCart()">Add to Cart</button>
22   </div>/.product
23
24   <!-- 2 -->
25   <div class="product">
26     
27     <h2>Laptop</h2>
28     <p>₹60,000</p>
29     <button onclick="addToCart()">Add to Cart</button>
30   </div>/.product
31
32 </div>
33 </body>
34 </html>
```

Output:

Observation:

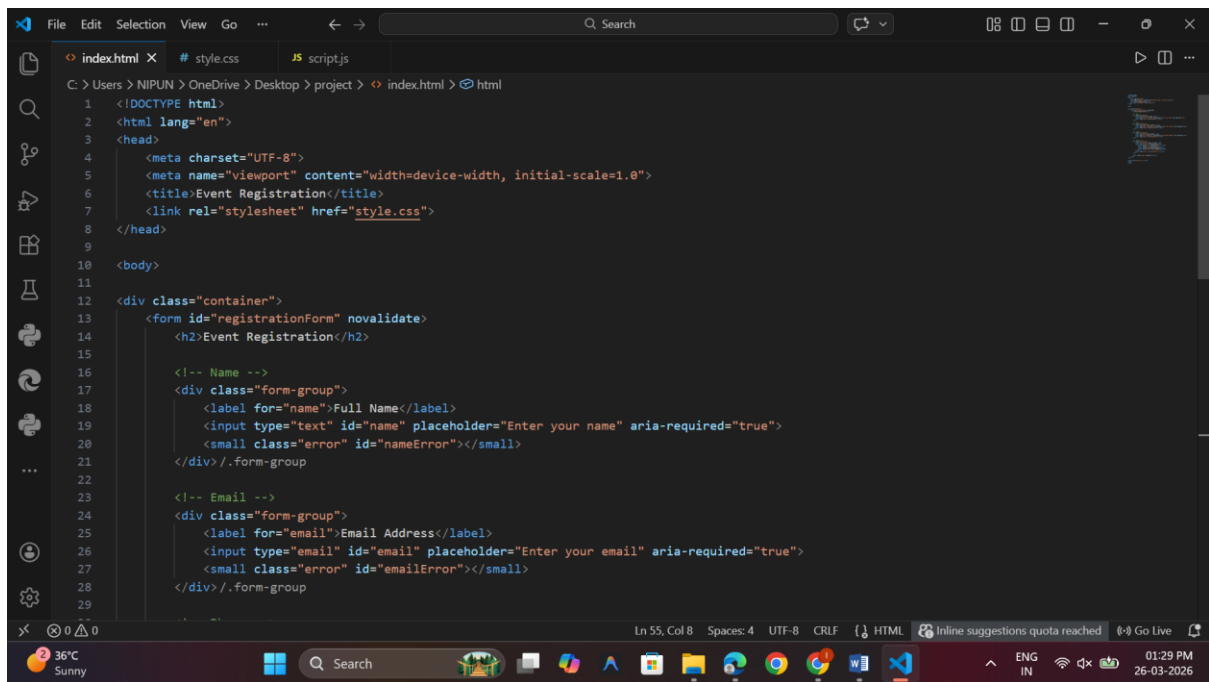

The product is displayed in a card format with a hover effect that improves visual interaction. The “Add to Cart” button works correctly and shows a confirmation alert. The layout is neat and responsive.

Task 3 – Event Registration Form

Prompt:

Build an event registration form to collect name, email, phone number, and session selection. Add JavaScript validation and ensure proper labeling for accessibility.

Code:

A screenshot of a code editor window showing the HTML code for an event registration form. The code is written in a dark-themed editor with line numbers on the left. The form is contained within a

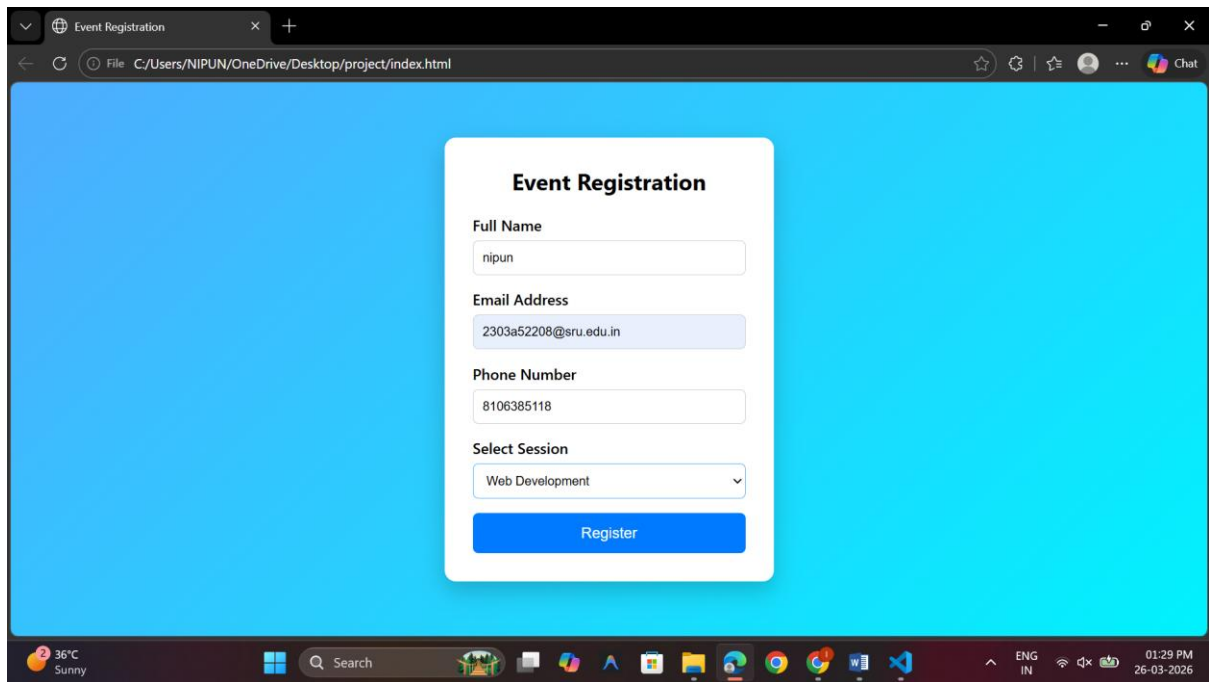

with class "container". It starts with a

Event Registration

 heading. There are two form groups. The first group is for the name, with a label "Full Name", a text input with id "name" and placeholder "Enter your name", and an error message with id "nameError". The second group is for the email, with a label "Email Address", an email input with id "email" and placeholder "Enter your email", and an error message with id "emailError". The code includes a attribute on the form and a aria-required="true" attribute on the input elements. The editor's status bar at the bottom shows "Ln 55, Col 8", "Spaces: 4", "UTF-8", "CRLF", and "HTML". The Windows taskbar at the very bottom shows the date and time as "01:29 PM 26-03-2026".

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Event Registration</title>
7   <link rel="stylesheet" href="style.css">
8 </head>
9
10 <body>
11
12 <div class="container">
13   <form id="registrationForm" novalidate>
14     <h2>Event Registration</h2>
15
16     <!-- Name -->
17     <div class="form-group">
18       <label for="name">Full Name</label>
19       <input type="text" id="name" placeholder="Enter your name" aria-required="true">
20       <small class="error" id="nameError"></small>
21     </div>/.form-group
22
23     <!-- Email -->
24     <div class="form-group">
25       <label for="email">Email Address</label>
26       <input type="email" id="email" placeholder="Enter your email" aria-required="true">
27       <small class="error" id="emailError"></small>
28     </div>/.form-group
29
```

Output:

Observation:

The form collects user data efficiently and prevents submission when required fields are empty. Validation works correctly, and the structure is easy to understand and use.

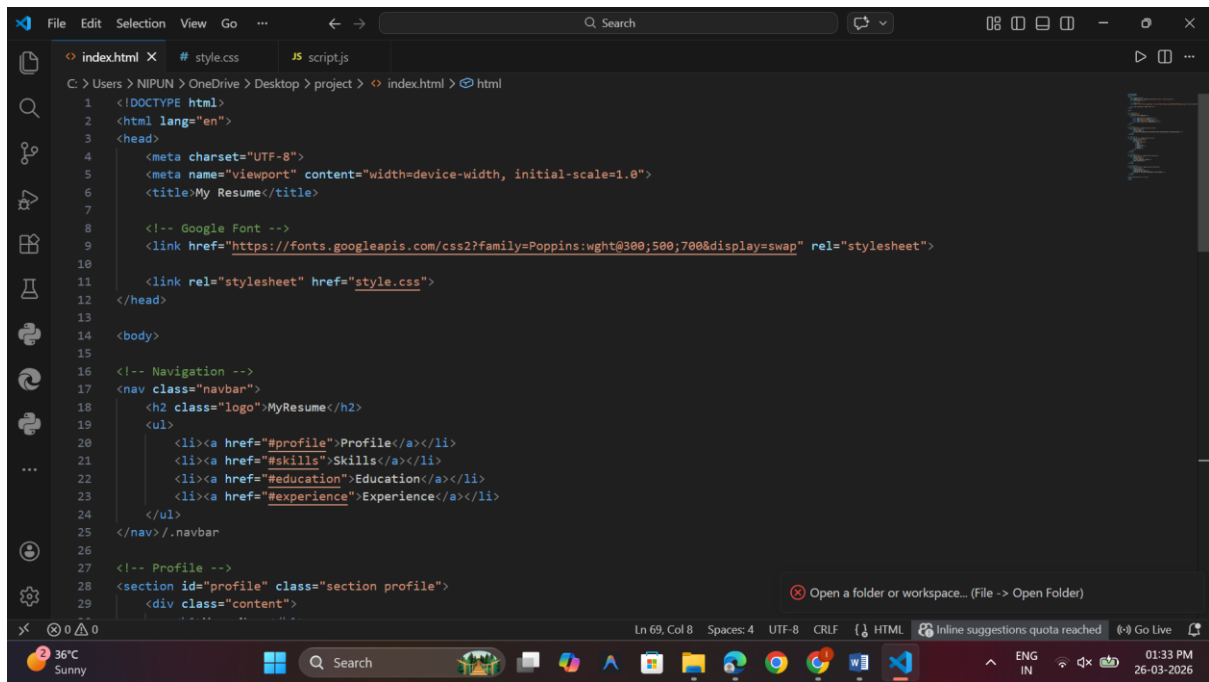

=====

Task 4 – Resume Website

Prompt:

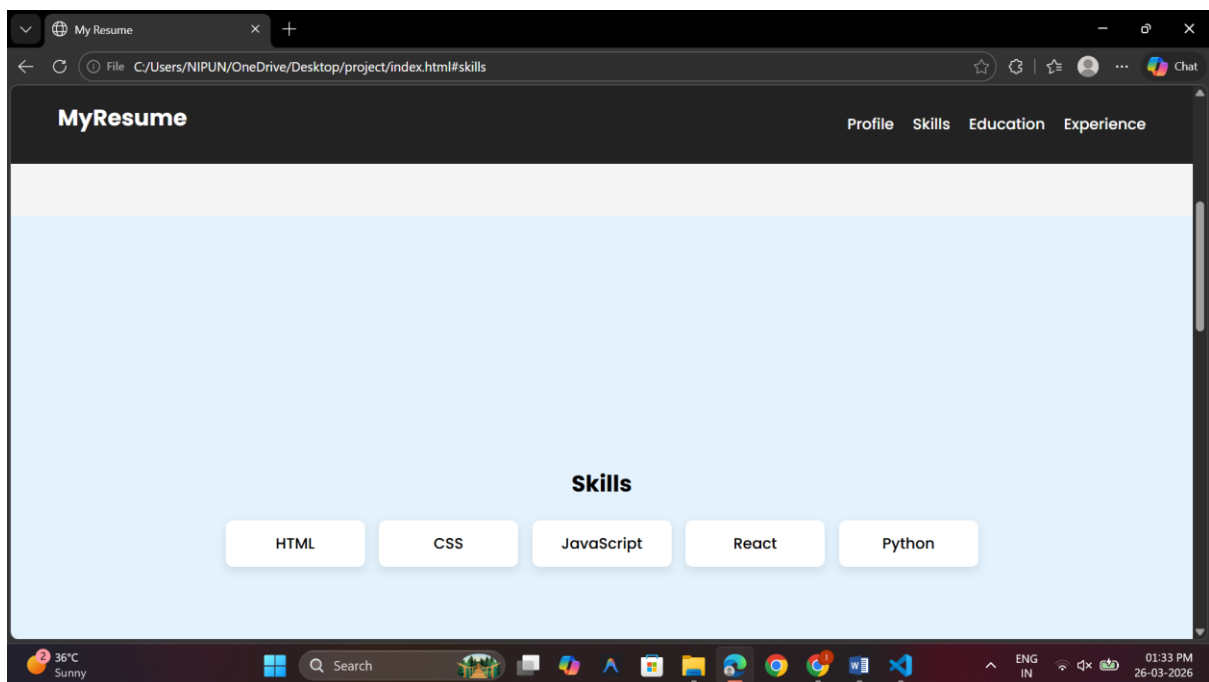

Create a one-page resume website including Profile Summary, Skills, Education, and Experience sections. Use CSS Grid to align the layout and maintain a professional design.

Code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>My Resume</title>
7
8   <!-- Google Font -->
9   <link href="https://fonts.googleapis.com/css2?family=Poppins:wght@300;500;700&display=swap" rel="stylesheet">
10
11   <link rel="stylesheet" href="style.css">
12 </head>
13
14 <body>
15
16 <!-- Navigation -->
17 <nav class="navbar">
18   <h2 class="logo">MyResume</h2>
19   <ul>
20     <li><a href="#profile">Profile</a></li>
21     <li><a href="#skills">Skills</a></li>
22     <li><a href="#education">Education</a></li>
23     <li><a href="#experience">Experience</a></li>
24   </ul>
25 </nav>/.navbar
26
27 <!-- Profile -->
28 <section id="profile" class="section profile">
29   <div class="content">
```

Output:

Observation:

The resume layout is well-structured and organized using grid. All sections are clearly visible and easy to read. The design looks professional and clean.

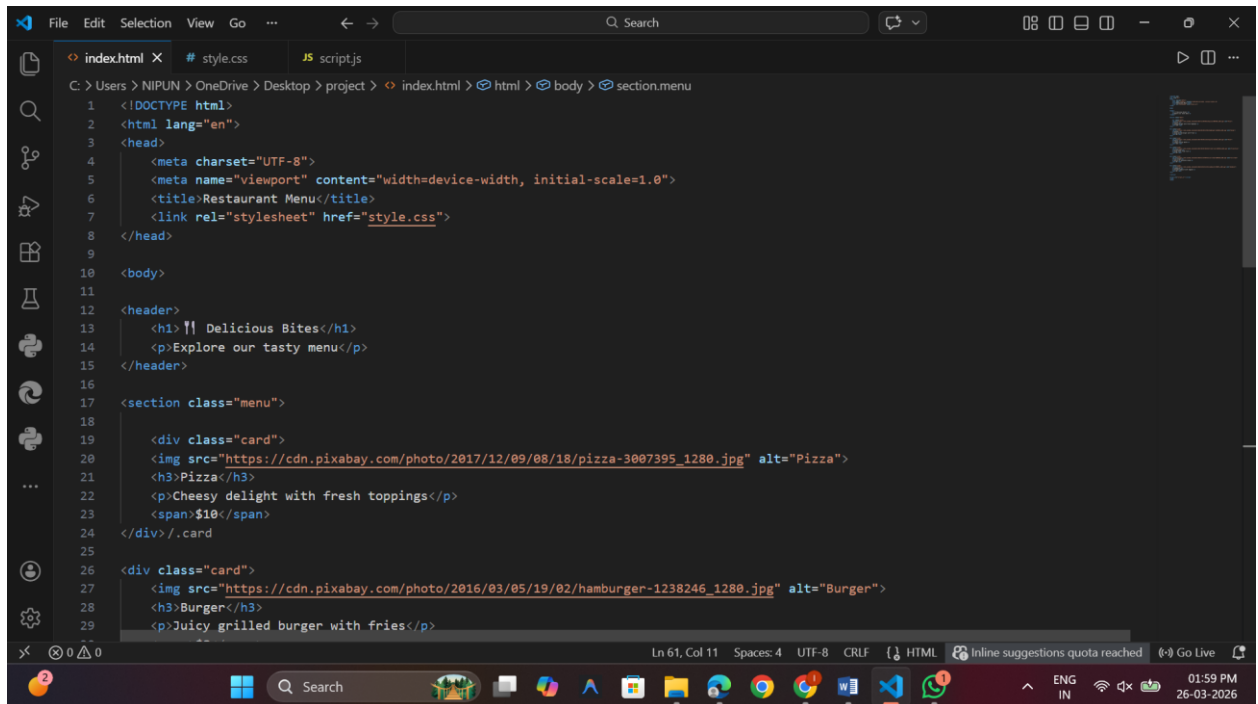

=====

Task 5 – Restaurant Menu Page

Prompt:

Design a restaurant menu page displaying food items with name, description, and price. Use a card-based layout with hover effects and ensure responsiveness.

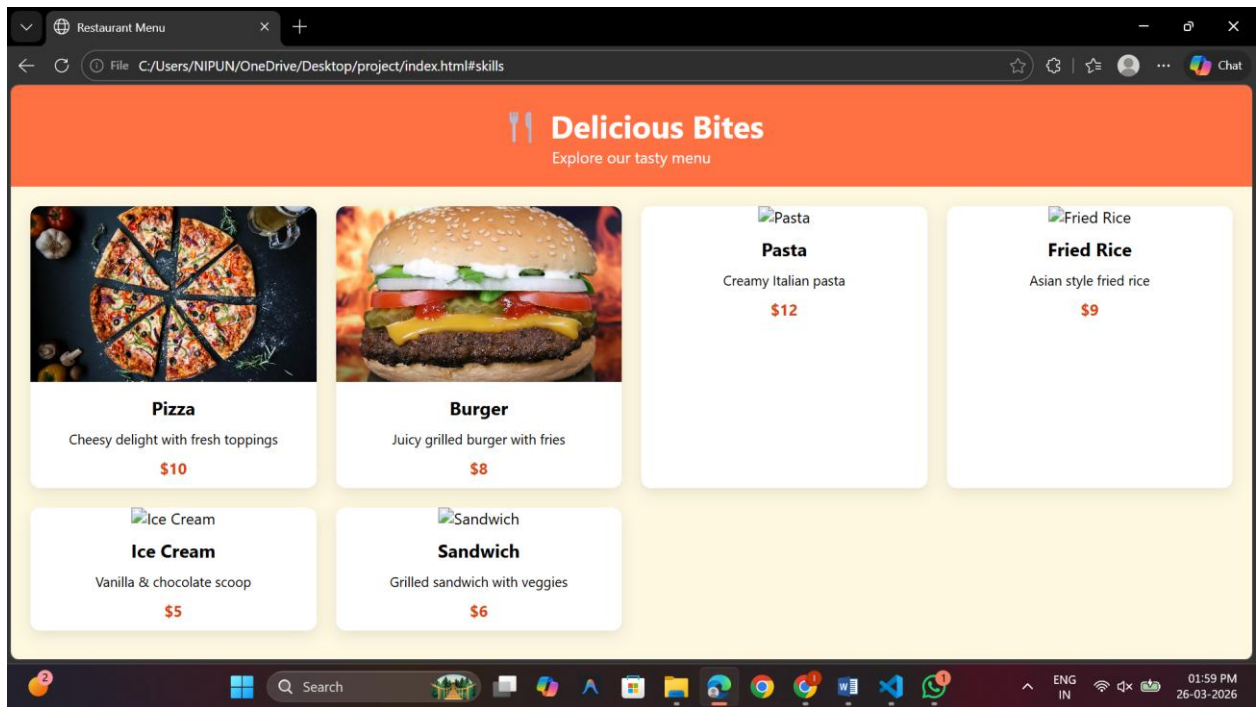

Code:

A screenshot of a code editor window showing the HTML code for a restaurant menu page. The code is written in a dark-themed editor with a sidebar on the left containing icons for Explorer, Search, Source Control, and Run and Debug. The main editor area shows the following HTML code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Restaurant Menu</title>
7   <link rel="stylesheet" href="style.css">
8 </head>
9
10 <body>
11
12 <header>
13   <h1>|| Delicious Bites</h1>
14   <p>Explore our tasty menu</p>
15 </header>
16
17 <section class="menu">
18
19   <div class="card">
20     
21     <h3>Pizza</h3>
22     <p>Cheesy delight with fresh toppings</p>
23     <span>$10</span>
24   </div> .card
25
26   <div class="card">
27     
28     <h3>Burger</h3>
29     <p>Juicy grilled burger with fries</p>
```

The code editor's status bar at the bottom shows "Ln 61, Col 11", "Spaces: 4", "UTF-8", "CRLF", "HTML", and "Inline suggestions quota reached". The Windows taskbar at the very bottom shows the search bar, task view button, and several application icons, including File Explorer, Google Chrome, and Microsoft Word. The system clock in the bottom right corner displays "01:59 PM" and "26-03-2026".

Output:

Observation:

Menu items are displayed in an attractive card format. Hover effects enhance user experience. The layout is flexible and adapts well to different screen sizes.
